

Index to Volume 20

AIHARA, S. I.: Optimal Control for One-Phase Stefan Problem with Random Emission	261
AL-HUSSAINI, A. N.: A Simplified Proof of the Representation of Functionals of Diffusions	63
ARNĂUTU, V.: Controlling the Spread of a Class of Epidemics	297
BARBU, V.: see Arnăutu, V.	297
BIELECKI, T.: On Ergodic Control Problems for Singularly Perturbed Markov Processes	131
BORKAR, V. S.: A Topology for Markov Controls	55
CAPASSO, V.: see Arnăutu, V.	297
COLONIUS, F.: Infinite Time Optimal Control and Periodicity	113
ELLIOTT, R. J.: Martingale Representation and the Malliavin Calculus	105
HAUSSMANN, U. G.: Stochastic Variational Inequalities of Parabolic Type	163
ISHIKAWA, M.: see Aihara, S. I.	261
JIONGMIN YONG: Systems Governed by Ordinary Differential Equations with Continuous, Switching and Impulse Controls	223
KLIEMANN, W.: see Colonius, F.	113
KOHLMANN, M.: see Elliott, R. J.	105
KUSHNER, H. J.: Diffusion Approximations and Nearly Optimal Maintenance Policies for System Breakdown and Repair Problems ...	33
MASCOLO, E.: Relaxation Methods in Control Theory	97
MIGLIACCIO, L.: see Mascolo, E.	97
PAO-LIU CHOW: Generalized Solution of Some Parabolic Equations with a Random Drift	1
PARDOUX, E.: see Hausmann, U. G.	163
PHAM HUU SACH: see Pham Huy Dien	71
PHAM HUY DIEN: Second-Order Optimality Conditions for the Extremal Problem Under Inclusion Constraints	71
SHERALI, H. D.: A Primal-Dual Conjugate Subgradient Algorithm for Specially Structured Linear and Convex Programming Problems	193
STETTNER, L.: see Bielecki, T.	131
TUDOR, C.: Optimal Control for Semilinear Stochastic Evolution Equations	319

ULULAR, O.: see Sherali, H. D.	193
WATANABE, H.: On the Convergence of Partial Differential Equations of Parabolic Type with Rapidly Oscillating Coefficients to Stochastic Partial Differential Equations	81
WEINRYB, S.: Etude d'une Equation Différentielle Stochastique Non Linéaire avec Temps Local, Modèle Limité pour un Système de Particules avec Interaction à la Frontière	237
ZEIDAN, V.: Sufficiency Conditions with Minimal Regularity Assump- tions	19
